

Cybersecurity Consulting Services

STAY ONE STEP AHEAD OF CYBER THREATS

Just like regular checkups protect your physical health, our Cybersecurity Consulting Services help protect your business from digital threats. With ongoing assessments, strategic guidance, and tailored solutions, we help your strengthen your cybersecurity posture while keeping costs predictable.

WHAT YOU GET

- Ongoing assessments using real-world attack methods
- Regular check-ins and tailored recommendations
- Strategic guidance from cybersecurity experts
- Predictable costs and scalable packages
- Policy reviews, planning, testing, and employee training

Why ProCern?

- ➔ Proactive and continuous protection
- ➔ Based on NIST frameworks and best practices
- ➔ Customizable to your business size and risk level
- ➔ Expert insights, clear reports, and executive guidance
- ➔ Designed to support compliance goals (HIPAA, PCI, SOC 2, etc.)

Cyber Briefings

What You'll Walk Away With

Every engagement delivers focused, ready-to-use insights—like a personalized risk report, response and recovery plans, phishing results, pen test findings, and clear visibility into firewall health, vendor risks, and dark web activity. We also keep your leadership in the loop with executive-level briefings.

Need more support? *We got you!*

Our core Cybersecurity Consulting Services meet the needs of most organizations—but if you need extra protection or help reaching specific compliance goals, we offer a variety of add-on services. These can be fully customized to fit your environment, with flexible pricing based on your needs.

Check out our POPULAR ADD-ONS!

RANSOMWARE IMPACT ANALYSIS

Simulations show how far an attack could spread before one ever happens.

CONFIGURATION BASELINE DEVELOPMENT & MONITORING

Track and maintain secure system configurations to meet compliance standards.

CLOUD SECURITY & COMPLIANCE REVIEW

Find and fix vulnerabilities across your cloud environments.

AUDIT READINESS & COACHING

We support your evidence gathering and audit prep for HIPAA, PCI, CMMC, and more.

PHYSICAL SECURITY REVIEWS

Comprehensive review of physical access controls and environmental safeguards.

PATCH MANAGEMENT

We handle update testing and rollout to minimize disruption and reduce risk.

Cybersecurity isn't a one-time fix.
It's a continuous process.

Let's turn strategy into action!
